SOFTWARE DEVELOPMENT PORTFOLIO

Character Mod for Darkest Dungeon | github.com/drlenny/DD_gourmet_mod

- Currently ongoing project in which I am solely responsible for designing and developing every single asset including art, animation, and code to create a new functional character to an existing game utilizing the custom C++ engine that the game's original team built
- Utilizing my skills to develop a large scale project and learn a custom programming language to design my own elements to integrate seamlessly into the existing code

Lenny's Dog Training | github.com/drlenny/dog-training-website | lennysdogtraining.onrender.com

- Designed and created a website to promote my personal dog training business
- The goal was to build an easily accessible site that relays important information and naturally guides viewers through the relevant pages promoting engagement

Keeper | github.com/drlenny/keeper-app | keeper-4xh1.onrender.com

- Sole developer and designer for a single page note taking app fully responsive to user input
- Learned React and its components through self-learning to more efficiently develop an app with multiple responsive elements in a page

PROFESSIONAL EXPERIENCE

Independent Computer Programmer, Freelance

October 2020 - November 2022

- Offered my services to several clients to build and test different programming projects according to their needs
- Presented and maintained my status as a professional in the field providing full transparency and ensuring that my clients' needs were met in a timely fashion
- Worked with several different languages fixing various bugs and designing small scale personalized applications to the extent of my abilities

Dog Trainer, Come And Train It, Montgomery, TX

March 2018 - January 2020

- Extensive interaction with clients to educate them on the proper expectations to hold for themselves and their dogs and how to maintain them using the training methods that have been conditioned
- Promote the ideals, goals, and success of the company to potential clients to increase sales
