---

Creative software developer skilled in building full-stack responsive web applications. Enjoys working in a collaborative team while quickly learning new skills, coding languages, and technologies required for the given task. Experienced as a dog trainer with the capacity to resolve issues quickly with professionalism and patience with clients and coworkers.

PROFESSIONAL EXPERIENCE

Software Developer, Freelance **|** Oct 2020 – Present
● Offered my services to several clients to build and test different programming projects according to their needs
● Resolved technical issues in code designed to iterate through an extensive amount of information from a game application compiled and logged via RegExp to track and record the in game resources improving the accuracy of the code by 40%
● Utilized various programming technologies such as Javascript, Angular, REST API, and React.js to fix various bugs and design personalized applications

Dog Trainer, Come And Train It, Montgomery, TX | March 2018 – Jan 2020
● Extensive interaction with clients to educate them on the proper expectations to hold for themselves and their dogs and how to maintain them
● Worked with both the clients and their dogs to establish conditioned routine and responsiveness when given instruction
● Promote the ideals, goals, and success of the company to potential clients to increase sales

PROJECTS

Character Mod for Darkest Dungeon | Repo
● Currently ongoing project in which I am solely responsible for designing and developing every single asset including art, animation, and code to create a new functional character to an existing game utilizing the custom C++ engine that the game's original team built
● Utilized a custom programming language to design my own elements that are integrated seamlessly into the existing code

Lenny's Dog Training | Repo | Website
● Developed a user-friendly platform for my personal dog training website that relays important information and naturally guides viewers through the relevant pages promoting engagement
● Solidified foundational HTML, CSS, and JavaScript skills by incorporating pagination and Embedded Javascript Templating along with Node.js

Personal Portfolio | Repo | Website
● Designed and developed a website application to showcase my abilities with an intuitive interface readily providing the necessary and relevant information
● Utilized React.js to implement responsive features and interactive UI while navigating the page
